- and others.

## Projects

**2010-2012: Confidential, sorry.**

**2007-2010: Apatar On-Demand**

[http://apatar.com/salesforce\\_and\\_quickbooks\\_integration.html](http://apatar.com/salesforce_and_quickbooks_integration.html)

SaaS system for bidirectional synchronization of your Salesforce and QuickBooks data.

- Basically designed & implemented it. Coordinated team of 4 engineers. Java, Javascript, SOAP, Spring, JSP, QuickBooks API, Salesforce API.

**2009: MD NPDB (Mediation Device for National Phone Data Base)**

Internal tool for lead Norwegian cellphone carrier (www.netcom.no). Synchronizes national and company database of cellphone numbers .

- Refactored existing tool from bare SQL ResultSets to Hibernate.
- Set up development environment (code repository, issue tracker, etc). Java, SQL, Spring Framework, Hibernate

**2007: WSM**

Gnome system-tray tool that monitors Sierra MC8775 WWAN card. Proprietary, ordered by Lenovo for custom RedHat distributions.

- Basically designed & implemented it from scratch. C, GTK+, RPM

**2005: WontonGold.com (domain reseller)**

- Refactored database from BerkeleyDB to PostgreSQL.

## PROJECTS BELOW ARE DONE WHILE IN HIGH SCHOOL

**2004: Templates**

Engine for rapid website creation dedicated to various events (weddings, birthdays, pets, small companies).

- Implemented by design.

PHP, Javascript, MySQL.

**2004: 123cakes.com**

A website where you can draw a text on an image of a cake and send the image to your friend over email.

Integrated with PayPal WebServices Pro. PayPal listed our company on their list of authorized integrators.

Java, PHP, Python, Javascript, Perl, Spring, Struts, Hibernate, \*SQL, BerkeleyDB

### **2003: Counters** [www.open.by](http://www.open.by)

Web sites attendance statistics. Basically, early competitor of Google Analytics, but focused on Belarus national market.

Didn't survive the competition (too small market for competitive investments).

- Implemented web frontend.  
PHP, Javascript, MySQL.

### **Technical Skills**

Web, OLTP, OLAP, ETL.

Java, Javascript, Python, Scala, C, \*SQL, GWT, Spring, Hibernate.

Cloud, Bigtable, Mapreduce, Publish/Subscribe, Google App Engine, Amazon AWS.

HTML (+HTML5), CSS.

Linux, Windows.

Octave, Mathematica.
